Destroy Your ATM Card – Keep your Debit Card!

Did you know that you don't need an ATM card AND a debit card for the same checking account? With your debit card, you can do so much more! You can make transactions from any participating ATM network, make purchases at most stores and get cash back from your transactions – all with the safety that Visa provides. If your Visa Debit Card is lost or stolen, and a fraudulent purchase is made, your liability is zero. That means you pay nothing! So if you have both cards, please call us so we can deactivate your ATM card.

New pen helps prevent check fraud

There is a new pen available that helps prevent check fraud and check washing – the Uni-ball 207™. The Uni-ball 207™ uses ink that contains color pigments, which are absorbed in to a check's paper fibers. When a thief tries to "wash" the information written on the check, the ink is in effect trapped. You can purchase it anywhere a wide variety of pens are sold.

What the Heck's a Googolplex?\*

Ever wonder: Which is worth more—a 1978 Boba Fett action figure or a 1989 Hot Wheels Lamborghini? If the U.S. could run out of money? Who's taking money out of your paycheck?

You'll find the answers to these and a googol of other questions by reading Googolplex, PriorityONE's online guide for student moneymakers.

Googolplex contains stories, games, and puzzles for elementary, middle, and high school students. It's all about money—getting it, saving it, spending it, borrowing it. It'll show you how business and the economy work and how you can take control of your financial future. And it'll make you laugh.

Read Googolplex today at www.priorityonefl.org, and come back regularly. You'll find something new each month. It's just one more way PriorityONE can help you make the most of your money.

\*A Googolplex is the largest number with a name. If we could know how many atoms there are in the universe, that number would still be less than a Googolplex.
